

som-multimodal-data reduction

Self-Organizing Maps + k-means · reduce high-dimensional, mixed-source measurements to maps you can read

multimodal materials data → interpretable maps

What it is: the de-widgetized, packaged, reproducible version of the analysis behind **Renteria et al., *J. Mech. Behav. Biomed. Mater.* 129, 105147 (2022)** — fusing enamel structure and property measurements to map structure–property relationships with aging across species.

Software: one shared config · pip-installable, tested · vendored SOMPY, **no GPU**.
